

September 15, 2017 Chain of Lakes Update

Aquest surveyed the lakes and was out on Strawberry, Zukey, and Portage this past weekend. Lake management opinion will be posted the week of September 18th. Please contact Doug Pullman, aquest@me.com if you have a concern regarding your lake.

We've also updated the timeline of activities to date for 2017 to include herbicide applications conducted in July and August.

Aquest would like to hold a workshop to provide information on what his Lake Scan reporting means and how he determines the condition of your lake. We are hopefully scheduling this workshop in late October so stay tuned.

Lastly, we met with the DEQ on Tuesday September 12 to discuss the conditions of the permits for the 2018 application season. Further review by the Fisheries Department is needed prior to issuing the conditions for the permit.
