

# Social distancing, self-monitoring, quarantine, isolation

Washtenaw County  
Health Department

What do these terms mean? And what do I do if I'm asked to do them?

## Social distancing

We should ALL be practicing social distancing. It helps protect everyone in our community, especially those who are most vulnerable, from illness. What does this look like?

### Individuals can:

- Keep six feet between people as much as possible.
- Get curbside pick up for groceries or restaurant orders instead of going inside.
- Use online or drive-through services at the bank.
- Avoid public places at their busiest times.
- Avoid getting together in large social groups.

### Businesses & organizations can:

- Have employees tele-work.
- Limit in-person meetings and travel.
- Modify operations to provide more online options and restrict people from gathering.

## We may also ask you to do any of the following:

### Who should do it?

### What is it?

People without symptoms, but who had a low-risk exposure like being in an airport or restaurant at the same time as someone with a confirmed case of COVID-19.

- Practice social distancing.
- Check & record your temperature 2x a day and watch for symptoms.
- If symptoms develop, CALL your doctor to explain symptoms and possible exposure before going in.

People without symptoms, but who have a higher potential of becoming sick because of where they traveled or having had contact with someone being tested for COVID-19.

- Stay home 24/7 and self-monitor for 14 days. Your quarantine may end after 10 days if you don't develop any symptoms AND you continue to monitor for symptoms for 14 days.
- Family and roommates should practice social distancing.
- If you become symptomatic, family and roommates should quarantine.

Travelers from China or Iran and close contacts of people who have tested positive for COVID-19.

- Same steps as self-quarantine
- Plus report your twice daily temperatures and symptoms to the Health Department during your quarantine.

People sick with symptoms of COVID-19 but not sick enough to be hospitalized.

- Stay in a separate room from the rest of their household members.
- Use a separate bathroom if possible. Keep toothbrushes separate if you must use the same bathroom.
- Family and roommates should avoid contact with sick person and practice self-quarantine.
- Wear a mask if you go into shared spaces.
