¹In August 2012, Michigan’s Public Health Code was expanded to *require* all flu vaccines administered to persons less than 20 years of age be entered into MCIR within 72 hours. In prior years entering flu doses into MCIR was strongly encouraged. In addition, the Michigan Pharmacists Association House of Delegates approved a resolution in February 2013 legislatively supporting a requirement that all vaccinations be entered into MCIR, regardless of age. These advancements have likely impacted the total number of doses entered into MCIR.
